

Sixteenth Marcel Grossmann Meeting

Tuesday, 6 July 2021

Multichannel Studies of Nonstationary Relativistic Stars: Block 1 (09:30 - 12:30)

-Conveners: Vladimir Lipunov

time	[id] title	presenter
09:30	[361] Multifrequency Behaviour of High Mass X-ray Binary Systems	GIOVANNELLI, Franco
09:50	[362] Three Stage Collapse From Prompt Multiwavelength Observations of GRB160625B	Prof. LIPUNOV, Vladimir
10:10	[423] Mergers, magnetars and multi-messengers	SMARTT, Stephen
10:30	[363] Recent results on magnetar flares and their connections with gamma-ray bursts and fast radio bursts	Dr FREDERIKS, Dmitry
10:50	[360] GRB Observations on Cubsate Satellites in the "Universat-SOCRAT" Project	Prof. SVERTILOV, Sergey
11:10	[369] The role of the magnetic fields in GRB outflows	Dr JORDANA-MITJANS, Nuria
11:30	[370] MASTER optical observations of the blazar TXS0506+056 during the IC170922A	Mr ZHIRKOV, Kirill
