

Magnetohydrodynamical processes around a Kerr black hole in horizon penetrating coordinates

Wednesday, 18 May 2022 15:15 (15 minutes)

Selected magnetohydrodynamical processes around a Kerr black hole are analytically investigated adopting horizon penetrating coordinates and focusing in particular on the associated electrodynamics and energetics.

Primary author: CHERUBINI, Christian (Department of Science and Technology for Humans and the Environment and ICRA, Campus Bio-Medico University of Rome, 00128 Rome, Italy and International Center for Relativistic Astrophysics Network-ICRANet, 65122 Pescara, Italy)

Co-authors: Dr LOPPINI, Alessandro (Department of Engineering, University Campus Bio-Medico of Rome); Dr MORADI, Rahim (ICRANet); Prof. RUFFINI, Remo (ICRA and ICRANet); Dr XUE, She-Sheng Xue (ICRA and ICRANet); Prof. FILIPPI, Simonetta (Department of Engineering and ICRA, Campus Bio-Medico University of Rome, 00128 Rome, Italy and International Center for Relativistic Astrophysics Network-ICRANet, 65122 Pescara, Italy); Dr YU, Wang (ICRANet)

Presenter: CHERUBINI, Christian (Department of Science and Technology for Humans and the Environment and ICRA, Campus Bio-Medico University of Rome, 00128 Rome, Italy and International Center for Relativistic Astrophysics Network-ICRANet, 65122 Pescara, Italy)

Session Classification: Afternoon session
