TOPICS

- multimessenger astrophysics;
- early universe, large scale structure, cosmic microwave background;
- neutron stars, black holes, gamma-ray bursts, supernovae, hypernovae;
- gravitational waves;
- quantum and gravity.

The series of Zeldovich meetings started with the celebration of the International Year of Astronomy 2009 in Belarus. These international meetings are organized in honor of Yakov Borisovich Zeldovich, a brilliant Soviet physicist and the father of the Russian scientific school on Relativistic Astrophysics, born in Minsk. The Zeldovich meetings are organized by ICRANet.
