

25 years of GRB/SNe: an overview

Monday, 12 June 2023 17:00 (30 minutes)

25 years after the discovery of the first GRB/SN, SN1998bw remains the best observed example of this extraordinary class of events. Several other GRB/SNe have been discovered, allowing progress in determining their overall properties.

I will review some of the advances and outline the outstanding problems in this field.
