

Are we prepared to observe the next Galactic Supernova? (online talk)

Tuesday, 13 June 2023 15:00 (30 minutes)

I will briefly review some of the observational facts of Supernovae from the perspective of multi-messenger astronomy, such as future optical and neutrino observations. Based on the current estimates of the supernova rate, some predictions are presented and discussed.

Presenter: DELLA VALLE, Massimo (INAF)

Session Classification: Tuesday afternoon session
