Hunting dark matter with the XENON experiments

Tuesday, 9 July 2024 12:00 (30 minutes)

A brief reminder of the case for particle dark matter and general search strategies will be followed by a description of the XENON dark matter program. The main part of the talk will cover details about the currently running XENONnT detector, the latest results and an outlook on future plans.

Presenter: LINDNER, Manfred (Max Planck Institute for Nuclear Physics)

Session Classification: Tuesday plenary session
